I am a Computer Science student seeking a Software or Computer Engineering internship. Strong foundation in programming, operating systems, networking, and data handling, with experience working in safety-critical industrial environments. Proven ability to solve complex problems, work with real-world systems, and collaborate with technical teams.

TECHNICAL SKILLS

Programming & Software Development

- Develop object-oriented programs in Java using sound design principles.
- Use Python for data handling, scripting, and basic automation tasks.
- Write C programs and Bash with an understanding of memory management and system-level behavior.
- Design and query relational databases using SQL.
- Use Git for version control and collaborative academic development.

Systems, Networking & Automation Concepts

- Understand operating system internals including scheduling, memory, and processes.
- Apply networking fundamentals such as TCP/IP, routing, and protocol behavior.
- Possess foundational knowledge of cybersecurity and cryptography principles.

Data & Problem Solving

- Collect, clean, and structure data for analysis and reporting using Python and R
- Communicate technical results clearly using visual and written formats.
- Apply algorithmic and analytical thinking to solve complex problems efficiently

EDUCATION

Bachelor of Science – Major in Computer Science
Minors in Mathematics and Data Science

January 2024 – Present

Mount Allison University
Sackville, NB

Relevant Coursework:

- Data Structures and Algorithms with Java.
- Operating Systems.
- Systems Programming with C and Bash, including memory management and process control.
- Object-Oriented Design using Java.
- Algorithm Analysis.
- Computer Networks, including TCP/IP, routing, and protocols.
- Database Systems with SQL and relational design.
- Data Acquisition, Visualization and Organization using R and Python.
- Cryptography and Discrete Structures.
- Linear Algebra, Applied Calculus, and Statistics.

Mechanical Technician: Precision Skills
September 2018 – April 2020

Georgian College
Barrie, ON

Courses included: CAD/CAM design, CNC applications, engineering drawing interpretation, and manufacturing processes

WORK EXPERIENCE

**NB Machinist Apprentice / Shift Lead Hand /
CNC Programmer**
Nov 2020 to January 2024

JessEm Tool Corporation
Moncton, NB

CNC Machinist and Quality Inspection
April 2019 – September 2019

Bramden Precision Aerospace Ltd
Newmarket, ON (Coop Student)

ADDITIONAL TRAINING & CERTIFICATIONS

- Contributed to a real-world data science repository through a semester-long academic collaboration with the **Canadian Research Knowledge Network (CRKN)**, performing bug fixes, system upgrades, and repository maintenance in coordination with industry professionals.
- Completed an API and Web Service Introduction certification through Udemy
- Completed CCNA and CompTIA A+ foundational training through the LEADS Institute of Computer Networking.
- Earned a J2SE (Java) certification from the G-TEC Institute.
