I am a hardworking university student and college graduate looking for employment to develop my skills and experience and meet the company's needs.

KEY SKILLS

- Skilled in providing top-tier customer service, swiftly resolving issues through problem-solving.
- Exemplary communication skills demonstrated through clear and concise verbal interactions with customers, ensuring their needs are effectively understood and addressed.
- Excel in multitasking, seamlessly managing various responsibilities while demonstrating proficiency in conflict resolution to ensure smooth customer interactions.
- Proven capability to thrive under pressure, adeptly managing multiple tasks with minimal supervision.
- Exhibited a proactive approach to problem-solving, consistently seeking solutions to challenges.
- Implement rigorous quality control measures to precisely adhere to organizational standards and tight tolerances.

TECHNICAL SKILLS

- Good with computers (MS Office, programming, etc.)
- **SMART SERVE** Ontario liquor serving license.
- Knowledge of CCNA, CompTIA+, Computer networking, Java, Python, etc.
- Proficient in the use of software like Autodesk Inventor, Mastercam, FeatureCam, SolidWorks, and AutoCAD
- Reading and interpreting engineering drawings, performing calculations, reading, and interpreting work-in-process documentation, verifying workpiece material, identifying, and selecting tooling and measuring instruments, or checking devices.
- Set up, operate, and maintain CNC and conventional machines like Mills, Lathes, Surface Grinders, etc.
- Inspect part dimensions by effectively using various precision measuring equipment.
- Apply Quality control and quality assurance procedures to meet organizational standards.
- Manufacture and Repair mechanical components according to required specifications.
- Ability to operate and complete production assignments to increase resources to meet demand.
